

Camp Ängra from above.

Wild trout at lake Gommors.

WILDLIFE SWEDEN

Camp Ängra is a paradise for flyfishing and sportfishing which is situated in the middle of Sweden in an overwhelming landscape along the central part of the Ljusnan River. We offer comfortable, modern accommodation and the opportunity for year-round sportfishing at all levels and for all ages. Excellent Grayling and Trout-, but also Perch and Pike fishing in the rivers around us like Ängraån and Ljusnan. But besides streamwaterfishing we also offer exclusive Wild trout-, Rainbow- and Char fishing in our own lake "Lake Gommors" which belongs to our camp.

Wildlife Sweden Camp Ängra is open (almost) all year. November... we're gone fishing ourselves.. somewhere on a beach. Main season for catching pike is in the spring and autumn. Under normal conditions it's great fishing from the middle of May until end of Oktober. It depends on what you want. Fishing for Perch and Pike is good all year-round..., main season for Greyling and trout is from the end of June until the end of September, but we also catch fish in winter...

Have you ever tried ice- fishing? ...a great and exciting way to catch Pike-, Trout or Char in the cold Swedish winter, in combination with some snowmobiling and a campfire, this is a thrill!

The waters around us are inviting for a great variety of fishing methods. Lake "Laforssjö" which is 20 km long offers great fishing on Pike and Perch and lays directly at our camp. For Grayling and Trout we take you to incredible spots along the centrepart of the river Ljusnan (a.k.a. "Mellan Ljusnan") only a flycast away from Ängra. But the best thing..., Ängraån ("River Ängra")... it runs right through the camp. Only a few steps away from your cottage, room or campingspot. All these waters and plenty of other waters in the surrounding area makes Ängra the place to be.

Cooperating with:

Ljusnan-trout.

Cottage in winter.

Trout from our own little stream "Ängraån"
