

## ANDREAS PERSSON

I live in Bollnäs and I have been fishing in the area for around 35 years with 100+ fishing days almost every year. I have altered techniques as spinning, trolling, vertical sharpshooting, dropshot, live/deadbait, flyfishing and coarse fishing over the years but spinning and live/deadbait targeting the big predators have always been a big focus especially in the spring and autumn. I do most of my fishing "specimen style" which has given me a very good knowledge of where to search for the really big fish.

My boat is rigged for spinning, jigging and vertical sharpshooting but if wanted I can rig it with downriggers for trolling. It's also very well suited for flyfishing for predators as well.

The main species I target with my guests is pike, perch and pikeperch. I have my boat on a trailer so it's possible to spice up your stay with a trip to do something special like vertical sharpshooting for arctic char or trolling for big trout. Maybe try one night's coarse fishing for big bream, roach, crucian carp or tench? My wide experience in different techniques makes it possible to fulfill most wishes.

In the winter I can offer fishing from the ice for pike, perch and pikeperch.

My boat is an Alumacraft Competitor 165 with a Honda 100 hp engine and a minnkota riptide iPilot link bowmount electric engine. Its equipped with an Onix 10 sonar with Auto-chart live and sideimaging. Rodholders and downriggers can be mounted if wanted. I provide self-inflating life vests for my guests. Capacity is guide + 3 guests.

I'm cooperating with Kungsholmen, Villa Solsidan and Gläntan.
