BLANKS I KALVHAGA

Welcome to extraordinary fishing and nice accommodation on the shore of the Hälsingland province's largest lakes! In the middle of Sweden the Dellen water system was formed by an impact crater 89 million years ago and the lakes South and North Dellen are now much appreciated fishing waters with excellent opportunities for trolling for large pike, perch and brown trout.

Staying with Blanks you live in our cosy cabin located very undisturbed and close to the forest, yet only 150 m from the shore facing a wonderful view of the lake and the surrounding mountains. The cabin is fully equipped for 4-6 persons, has a nice fireplace, a big veranda and close to the house you will find nice walking trails through forests and along the shore, a beach and your own boat landing stage.

Renting our fully equipped 5,20 m stabile fishing boat you will have access to perfect conditions for both trolling, spin fishing and jerkbait fishing. The season is at it's best from May to November depending on what you want to catch. Our boat has a 30 HP (4-stroke) engine, an electric engine (55LBS), GPS/Sonar Garmin GPSMAP 521S and other equipment to make your fishing tour as handy as possible.

We cooperate with "Knosas Fishing", which offers professional fishing guiding and long experience of were to seek fish in our waters. Our cabin is located in the area of the Swedish World Heritage "Decorated Farm Houses of Hälsingland". For the interested we offer guided tours of our old family Hälsingland Farm House "Blanks i Kalvhaga".
