Freluga Golf & River Lodge.

COTTAGE IN HÄLSINGLAND

We welcome you to Freluga Golf & River Lodge, our facility at Voxnans shoreline offers an accommodation with a standard a little above the ordinary. The lodge consists of an exclusive and old traditional farmhouse with a genuine atmosphere and with all modern facilities. But above all, we welcome you to fish in the varied and scenic water system that the river Voxnan and lake Voxsjön offers. Appreciated by our guests for its recognized good stock of big pike and fine perch. There's also a Zander stock to explore. We offer our guests three well-equipped fishing boats, Kimple 430 with 6 hp engine.

To maximize your fishing experience, we recommend you to book our fishing guide **Martin Elversson** for a day or half, what he does not know about fishing in our waters is not worth knowing. We, and FIMS invest in long term sustainable fishing in our waters, and therefor recommend "Catch & Release" for our fishing guests.

If you at any day of your stay want to try other types of fishing, you can within a 15-20 minute drive reach fine fly fishing waters with trout and grayling. Or why not test a small idyllic forest lake with put & take fishing. A nice trout is never wrong at the dinner table.

Sometimes even the most hardened fisherman want to do something completely different. Why not take the family or friends on a leisure break to some of the amazing sights the area offers. You can try and improve your golf skills at a nine-hole golf course and possibilities to rent canoes or take a walk in the wild nature surrounding the lodge.
